

About Correlix, Inc

Correlix Inc. enables customers to monitor measure and minimize latency in trade execution and market data flow in real time. Correlix provides Latency Intelligence™ software that pinpoints and quantifies sources of latency reducing the time it takes by milliseconds to execute a trade or deliver and act on market data. Providing both real time and historical analysis, customers use Correlix products to trace trading transactions across complex, diverse landscapes to report multi-step flow latency by destination, customer or trade path. Correlix customers include capital market firms on the buy and sell side and in exchange environments. Established in 2005, Correlix is headquartered in New York with research and development offices in Israel. Correlix is venture financed by Sequoia Capital, Genesis Partners, Blumberg Capital and Xenia Ventures.
